Dear Business Partners,

You are holding a publication promoting Czech companies presented at this important trade event. Participating at this event is a prestigious opportunity for these Czech companies. It is a way of saying that Czech companies have a rightful place on this market and that they are players to be reckoned with.

We would like to emphasize that at a time of World Wide Web, online trading, e-auction and similar novelties, trading and investments are done by people – people who meet at business meetings, managers – highly qualified experts who would enjoy checking out the presented novelties, negotiating technical specifications and learning about new trends and developments. This is the kind of platform that trade fairs offer and cannot be substituted; at a time over-saturated with information, trade fairs play an irreplaceable role and are an important trading and marketing channel.

Technical development and technologies in all areas of human endeavour move forward at a fast pace and the Czech companies are not afraid of presenting their novelties at trade fairs, side to side with those of their competitors; to the contrary, they see it as a challenge.

Our producers strive for meeting specific customer demands and primarily focus on continuous improvement of product quality, together with reducing their energetic demands and streamlining production processes. Such efforts correspond to current environmental trends, but first and foremost, it is a way of ensuring competitive pricing. It cannot be doubted that price and quality are the key drivers behind a successful business.

Of course, everybody here is interested in selling their products. However, we stand out; as besides our products and services, we offer economic, technical and

technological cooperation, seek partnerships and subcontractors for our projects and prospective investments on the global market. What we offer is mutually beneficial cooperation.

We can all agree that presenting their goods and services at trade fairs is a unique opportunity for producers, and a necessary marketing tool, to introduce to their customers, clients and the expert public the level and quality of their services and technical and technological solutions.

We wish you many successful business and social meetings at this outstanding event.
